SUMMARY

React Native and full-stack JavaScript developer with 3 years building and shipping production mobile and web applications end-to-end. Multiple apps live on the App Store and Play Store, with hands-on ownership of the full release pipeline — Expo/EAS builds, TestFlight, App Store Connect, and Play Console. Strong across React Native, React/Next.js, and Node/Express, with direct client delivery experience across 30+ remote projects (4.9/5 client rating). Comfortable owning features from API integration through store release and production bug-fixing.

TECHNICAL SKILLS

Mobile: React Native, Expo, EAS Build, React Navigation, TestFlight, App Store Connect, Play Console, Xcode, Android release workflows
Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+), Tailwind CSS, HTML, CSS
Backend & Data: Node.js, Express.js, REST APIs, MongoDB, Supabase (PostgreSQL), Firebase/Firestore
State & Integrations: Redux Toolkit, Context API, Axios • Stripe, RevenueCat, Shippo, AdMob, Push Notifications, Deep Linking
Tooling: Git/GitHub, CI/CD (mobile build & release), Postman, Vercel, Netlify

EXPERIENCE

MERN Stack Developer — Bitrupt • Karachi, Pakistan (On-site / Hybrid) *Sep 2023 – 1 Sep 2026*

- Build and ship production React Native (Expo) apps to the App Store and Play Store, owning the full release pipeline: EAS builds, TestFlight, App Store Connect, and Play Console submissions.
- Develop full-stack features across React.js / Next.js front ends and Node.js / Express REST APIs, backed by MongoDB and Supabase (PostgreSQL).
- Integrate third-party services into live apps — Stripe payments, RevenueCat subscriptions, Shippo shipping, and AdMob ads — plus push notifications and deep linking.
- Own assigned features end-to-end, from API integration through store release, production bug-fixing, and app stability and performance improvements.
- Contributed to 40+ company and client mobile/web projects, release cycles, and production delivery tasks (selected public apps below; remaining work under NDA).
- Coordinate with designers, backend developers, QA, and project managers to deliver production-ready features.

Frontend Developer Intern — Bitrupt • Karachi, Pakistan *Mar 2023 – Sep 2023*

- Built UI components and small applications in React.js and React Native — including a real-time chat app, a Redux-powered product/cart page, and a Twitter-style web app — practicing state management, API integration, and responsive layouts.
- Learned production workflows alongside senior developers, contributing to debugging and feature work on live projects.

FREELANCE / CLIENT WORK

Independent Client Work — Remote / international clients

- Delivered 30+ web and mobile projects for remote clients, owning the full cycle: requirements, scoping, development, revisions, and post-delivery support, while maintaining a 4.9/5 client-satisfaction rating.
- Built React Native, React / Next.js, and Node / API solutions to client spec under real deadlines, handling all client communication directly.

SELECTED PUBLIC APPS

Barakah Planner — task & Islamic routine planner (iOS + Android). App Store • Play Store **— Role: React Native / Full-Stack Developer**
Bondfire Society — social app for meeting people & making friends (iOS + Android). App Store • Play Store **— Role: Frontend Developer and resolved UI/UX bug.**
PawSpace — pet products marketplace & community, built at Bitrupt (iOS). App Store **— Role: React Native / Full-Stack Developer**
Celebrity Response — social/content interaction app (iOS). App Store **— Role: Frontend Developer; developed React Native UI screens, integrated backend APIs for app flows, implemented frontend state handling, resolved UI/UX bugs, and supported testing for App Store release.**

EDUCATION

BS Computer Science — Iqra University, Karachi *Oct 2024 – Sep 2028 (Expected)*
